## SOFTWARE DEVELOPER JR

### ABOUT

Student of Computer Systems engineering looking for a internship in a world wide company to prove myself. I believe in tech to improve the world and i want to work for that.

I have experience with all the modern Web Development and JavaScript Stack (HTML5, CSS3, JavaScript, Node).

I mostly work with web development in the client side, my two favorite frameworks are: ReactJS and Svelte

### WORK EXPERIENCE

#### IMEPLAN TAMPICO: ANDROID APP

Java Junior | June 2018 - December 2018

- Test and debug of the project.
- Minor bug fixing
- Production Launch to PlayStore

#### BLOCKCHAIN DEVELOPER AT ZETI.AI

Solidity & JavaScript Developer | June 2021 - Today

zeti.ai is a small project from incredible people that taught me a lot, it has several areas of development, from web development to AI.

My duties:

- Web Development in Javascript using Svelte as framework with very high standards, refactoring my code over and over to get the best product.
- Blockchain development and testing using Solidity and Hardhat.

Other techs:

Ubuntu, MacOS, G Cloud, Gitflow, Atlassian.

### EDUCATION

#### Instituto Tecnológico de Ciudad Madero

"Computer Systems Engineering" Bachelor's Degree | 2017 - 2021

- Big Data specialization
- 3 years of experience using Java for scholar project development..
